

Hi Darlene.

Regarding the recently completed renovations to ground level front room of our townhouse in Vancouver overlooking the Fraser River. The good size room with a garden patio and south exposure has always had potential but was mostly a storage room and a bit of a recreation room / guest bedroom. We emptied the room and tore up the carpeting, revealing a rather poorly laid concrete floor. Solid Wood came and looked at the space and gave advice, including a heated tile floor, dimmable implanted ceiling lighting, a new closet, and a wonderful green (my choice) with white trim paint job. The room is now gorgeous and that floor, even our dog loves it. The craftsmanship, over-coming the uneven surface to get the tiles down properly, is evident, as well as the overall quality of the work. I have no doubt our increased property value has exceeded the investment making the home a 'true' three bedroom townhouse, although with no immediate plans to sell we expect to enjoy the space, summer and winter, for years to come. Thank you Solid Wood for a job well done.

Don and Laurie, Vancouver, B.C.
